22 Mar. 2021	Public Disclosure of Information 1/2021

Progress and outcomes of the activities

Key issues	Progress and outcomes
Concept on supply chain control of reclaimed timber	- The concept paper will be developed based on the current regulation. The paper will also propose concept to resolve the existing gaps in the current supply chain control, such as the lacking of regulatory control for in-province reclaimed timber transport, import control point which does not segregate between new and reclaimed timber, and the processing point in which the current regulation does not provide guidelines for factory to keep record of reclaimed timber
Concept on supply chain control of public land	- The concept paper is near conclusion. It was furthered improved before the discussion at the Technical Meeting with FAO-EU FLEGT Programme, European Forest Institute
